

837 Professional Health Care Claim

This companion document is for informational purposes only to describe certain aspects and expectations regarding the transaction and is not a complete guide. The details contained in this document are supplemental and should be used in conjunction with the ASC X12 Standards for Electronic Data Interchange Technical Report Type 3 (TR3) as published by the Washington Publishing Company.

Section 1 – 837P Professional Health Care Claim: Basic Instructions

Section 2 – 837P Professional Health Care Claim: Enveloping

Section 3 – 837P Professional Health Care Claim: Charts for Situational Rules

Any questions?

Section 1 - Basic Instructions

1.1 X12 and HIPAA Compliance Checking, and Business Edits

EDI interchanges submitted to UniCare for processing pass through compliance edits. 5010 acknowledgments and reports for accepted/rejected files will be placed in the submitter's trading partner mailbox for pickup.

- TA1 Interchange Acknowledgment. UniCare returns TA1 X12 and proprietary reports to the submitter of inbound 837 files containing envelope errors in the ISA and GS segments.
- Level 1. UniCare returns a 999 Interchange Acknowledgment to the submitter for every inbound 837 transaction received. Each transaction passes through edits to ensure that it is X12 compliant. If the X12 syntax or any other aspect of the 837 is not X12 compliant, the 999 will also report the Level 1 errors in AK segments and indicate that the entire transaction set has been rejected.
- Level 2. In addition to HIPAA TR3 edits, UniCare applies business edits to ensure that the necessary information is populated and complete for efficient processing. When encountering HIPAA compliance (including balancing), code set or business errors, UniCare returns: 1) 277 Claims Acknowledgment (CA) and 2) 864 Level 2 Status Report to the submitter identifying which claim(s) have failed.

1.2 HIPAA Compliant Codes

Use HIPAA-compliant codes from current versions of the following:

- Physician's Current Procedure Terminology (CPT)
- Health Care Financing Administration Common Procedural Coding System (HCPCS)
- International Classification of Diseases Clinical Mod (ICD-9-CM) Diseases
- Provider Taxonomy Codes
- National Drug Code

1.3 Diagnosis Codes

According to the 837P TR3, a transaction is not X12 compliant if decimal points are used in diagnosis codes. Therefore, should a diagnosis code contain a decimal point, UniCare will return a 999 to the submitter indicating that the transaction has been rejected.

1.4 Procedure Codes and Modifiers

All valid CPT and HCPCS codes and modifiers are accepted for claim adjudication. Refer to your billing guidelines or provider contract for submission of these codes. If submitted codes are invalid, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.5 Uppercase Letters, Special Characters, and Delimiters

As specified in the TR3, the basic character set includes uppercase letters, digits, space, and other special characters.

- All alpha characters must be submitted in UPPERCASE letters only.

- Suggested delimiters for the transaction are assigned as part of the trading partner set up. E-Solutions Representative will discuss options with trading partners, if applicable.

Inbound Delimiters		
	Suggested Value	
Data Element Separator	*	Asterisk
Sub-Element Separator	:	Colon
Segment Terminator	~	Tilde
Repetition Separator	^	Caret

- To avoid syntax errors, hyphens, parentheses and spaces are not recommended to be used in values for identifiers.

Examples: Recommended: Zip Code 123456789 Medical Record # 1234567

- Since originally submitted values may be returned on outbound transactions, UniCare encourages trading partners to not use the following special characters as part of the value: asterisk (*), less than/greater than signs (<, >), colon (:), and slash (/). This minimizes the risk for a special character to be recognized as a delimiter.

Example: Provider assigns a Patient Control Number '12*3456789'. Although an asterisk (*) is a valid special character, it adversely affects processing since it is also a common delimiter. The value '12*3456789' may process incorrectly as two separate values '12' and '3456789'.

1.6 Decimal "R" Data Element Types

"R" data element types contain a decimal point; involving monetary amounts, units, visits, weights, and frequency. UniCare recommends using decimal points for monetary amounts, and whole numbers for other types of "R" data elements. Except for monetary amounts, if "R" data element type includes a decimal and numbers after the decimal, UniCare adjudicates the claim based on the whole number. Numbers after the decimal will not be considered.

1.7 Numeric Values, Monetary Amounts and Units

- UniCare pays all claims in US dollars and therefore, accepts monetary amounts in US dollars only. If codes related to foreign currencies are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- UniCare recognizes units in whole numbers only.
- If a negative service line charge (SV102) or negative units (SV104) are used, then a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.8 Address Information

- P.O. mailboxes / Lock Boxes are not allowed in the Billing Provider loop. If submitted in the Billing Provider loop, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.
- The Pay-to Address loop does support P.O. Box / Lock Box addresses. Therefore, if payment is expected to be remitted to a P.O. Box / Lock Box, submit the P.O. Box / Lock Box address.
- Full 9-digit zip codes are required in the Billing Provider and Service Facility Location loops. If 5-digit zip codes are used in these loops, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

1.9 Coordination of Benefits

Specific 837 data elements work together to coordinate benefits between UniCare and Medicare or other carriers. Following the Provider-to-Payer-to-Provider model;

- The provider sends the 837 to the primary payer.
- The primary payer adjudicates the claim and sends an 835 Payment Advice to the provider. The 835 includes the claim adjustment reason code and/or remark code for the claim.
- Upon receipt of the 835, the provider sends a second 837 with COB information populated in Loops 2320, 2330A-G, and/or 2430 to the secondary payer. The secondary payer adjudicates the claim and sends an 835 Payment Advice to the provider.

UniCare recognizes submission of an 837 transaction to a sequential payer populated with data from the previous payer's 835. Based on the information provided and the level of policy, the claim will be adjudicated without the paper copy of the Explanation of Benefits from Medicare or the primary carrier.

When more than one payer is involved on a claim, data elements for all prior payers must be present (i.e., if a tertiary payer is involved, then all the data elements from the primary and secondary payers must also be present).

If data elements from previous payer(s) are omitted, UniCare will fail the particular claim.

Since 5010 has made changes to COB reporting, UniCare strongly encourages in-depth review of TR3 front matter. UniCare adjudicates and pays professional services at the line level. Therefore, when UniCare has any payment position other than primary, line level payments (SVD02), and line level adjustments (CAS), must be conveyed, when known by the submitter

1.10 Claim and COB Balancing

For COB claims, balancing is performed at both claim and service line on the payment charges for each payer. If not balanced, a 277CA and an 864 Level 2 Status Report will be returned to the submitter identifying which claim(s) have failed.

- Loop 2300 CLM02 (Total Claim Charge) must equal the sum of Loop 2400 SV102 (Line Item Charge).
- Loop 2320 AMT02 (COB Payer Paid Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) less the sum of Loop 2300 CAS (Claim Level Adjustments).
- Loop 2400 SV102 (Line Item Charge Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) plus the sum of Loop 2430 CAS (Claim Level Adjustments).

1.11 Sending Solicited Attachments to Support a Claim

This process begins when UniCare requests specific documentation/attachment's from the provider to support a claim that has been received for processing. Please include letter instructions via the following mailing address:

Mailing Address: UniCare
 P.O. Box 60007
 Los Angeles, CA 90060-0007

1.12 Preparing and Sending Unsolicited Attachments to Support a Claim (Loop 2300 PWK)

Loop 2300 PWK segment is required when documentation (attachments) supports a claim.

A) Sending attachment(s) electronically (PWK02=EL) with Medical Electronic Attachment vendor (MEA)

- Enter prefix 'MEA' and all alphanumeric characters assigned as your tracking number (ex. MEA12345B) to become the Attachment Control Number (PWK06).

B) Sending attachment(s) by mail or fax (PWK02=BM, FX)

- Create unique Attachment Control Number (PWK06) for each attachment using NPI, Member ID #, and date of service.
- Mail or fax the attachment(s) the day the claim is submitted.
- Do not send unnecessary attachments (i.e., copy of the member's ID card).
- Ensure claim and attachment matches based on the Attachment Control Number (PWK06), otherwise the claim may be denied.
- Ensure that the same Attachment Control Number (PWK06) is used for multiple attachments supporting a single claim.
- Ensure all information is legible to avoid processing delays.
- If claim with supporting documentation is rejected, correct the claim using the same Attachment Control Number (PWK06). UniCare will hold the attachment and match the claim once it is received. However, if a new Attachment Control Number is assigned, supporting documentation referencing the new Attachment Control Number will need to be submitted.

1.13 Taxonomy Codes (PRV)

The Healthcare Provider Taxonomy code set divides health care providers into hierarchical groupings by type, classification, and specialization, and assigns a code to each grouping. The Taxonomy consists of two parts: individuals (e.g., physicians) and non-individuals (e.g., ambulatory health care facilities). All codes are 10-alphanumeric positions in length. Health care providers select the taxonomy code(s) that most closely represents their education, license, or certification. If a health care provider has more than one taxonomy code associated with it, a health plan may prefer that the health care provider use one over another when submitting claims for certain services.

It is strongly recommended that the taxonomy be populated in PRV segments for all applicable claims that you are filing. Refer to the CMS website for a listing of codes, www.wpc-edi.com/taxonomy.

1.14 Medicaid Reclamation / Subrogation Claims

Situations exist when a Patient who has UniCare as primary and Medicaid as secondary (last payer), indicates to the provider that he has Medicaid insurance only. The service is rendered and the provider bills Medicaid as primary. Medicaid pays the claim as the sole payer ("pays out of turn") and later determines that the patient actually had primary insurance.

In order to reclaim monies, states submit claims to the primary insurance after reconciliation of eligibility files between UniCare and Medicaid. Exempt from NPI, trading partners on behalf of states must submit specific data elements in Loops 2010AA, 2010AC, 2010BB, 2310B and 2430 for Medicaid reclamation.

Section 2 - Enveloping

EDI envelopes control and track communications between you and UniCare. One envelope may contain many transaction sets grouped into the following:

- Interchange Control Header (ISA)
- Functional Group Header (GS)
- Functional Group Trailer (GE)
- Interchange Control Trailer (IEA)

837 Professional Health Care Claim–Envelope Specific to UniCare (TR3, Appendix C)
